42100

AVAILABLE TO HIRE OR BUY

Solutions for Major Highways

Suitable for major roads up to 70mph; each sign comes pre-programmed with up to 200 Highways Agency approved messages and pictograms, in addition to the facility allowing you to create unique messages.

Built to withstand rain or shine, the 42100 uses the very latest solar technology making it highly energy efficient and environmentally friendly, with no diesel fuel supply required.

With a full matrix LED configuration, capable of displaying the highest legibility in messages and graphics, this versatile sign is essential for complex high speed traffic management situation such as road works, congestion & speed control, major events and accident management.

With remote message programming available as standard on all MTS signs, changing the message from the comfort and safety of your office PC or smart phone couldn't be easier. Secure username and passwords protect the sign against unauthorised use and the remote monitoring system constantly checks LED pixel integrity, auto-brightness adjustment and battery voltage levels.

Applications include:

- ✓ High speed road traffic management
- ✓ Advance notice of lane closures and works
- ✓ Major event management

Key Features & Benefits

- ✓ EN12966-1 2005 LED compliant for UK road use
- ✓ HA approved fonts & character sizes up to 400mm
- ✓ Remotely operated flashing beacons for Highways Agency use and compliance
- ✓ Web-based remote programming system - no software installation required on client PC or network
- ✓ Ultra-bright traffic angle LED - no blur or driver distraction
- ✓ GPS tracking option
- ✓ Vertical & 360° rotational movement for perfect positioning
- ✓ Hydraulic mast - no manual handling on the roadside
