## 4280

AVAILABLE TO HIRE OR BUY

### High Impact Information

Suitable for urban and trunk roads alike, this easy to manoeuvre sign packs a real punch; advising of major events, road closures and utility works.

Built to withstand rain or shine, the 4280 uses the very latest solar technology making it highly energy efficient and environmentally friendly, with no diesel fuel supply required.

With a full matrix LED configuration, capable of displaying the highest legibility in messages and graphics, this versatile and easily transportable sign is essential when considering effective traffic management solutions.

With remote message programming available as standard on all MTS signs, changing the message from the comfort and safety of your office PC or smart phone couldn't be easier. Secure username and passwords protect the sign against unauthorised use and the remote monitoring system constantly checks LED pixel integrity, auto-brightness adjustment and battery voltage levels.

### Applications include:

- ✓ Traffic management
- ✓ Advance notice of works and events
- ✓ Transport hub messaging

### Key Features & Benefits

- ✓ EN12966-1 2005 LED compliant for UK road use
- ✓ HA approved fonts & character sizes up to 400mm
- ✓ Remotely operated flashing beacons for Highways Agency use and compliance
- ✓ Web-based remote programming system - no software installation required on client PC or network
- ✓ Ultra-bright traffic angle LED - no blur or driver distraction
- ✓ GPS tracking option
- ✓ Vertical & 360° rotational movement for perfect positioning
- ✓ Hydraulic mast - no manual handling on the roadside
