

# T-25

## SENSOR TRAILER

AVAILABLE TO HIRE OR BUY

### Portable Power Source

The T-25 is an environmentally friendly platform which can be used independently utilising a portable SmartSensor for data collection providing analytical information, or when used in conjunction with our Advantage series portable Variable Message Signs (pVMS) provides real-time queue detection.

The T-25 uses the very latest innovative solar technology - battery powered, recharged using solar panels and capable of autonomous operation for significant periods of time.

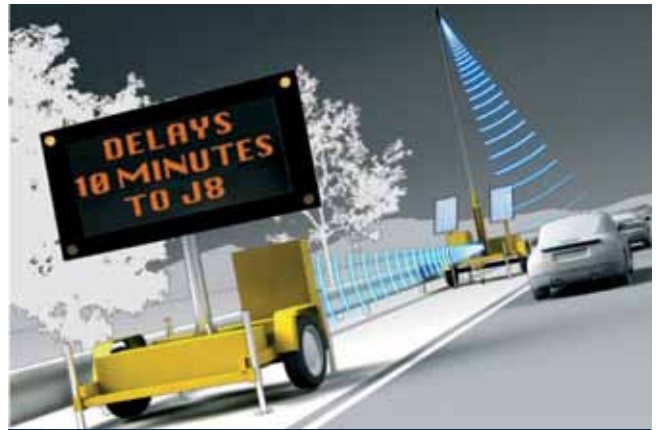

The T-25 trailer also provides a stable platform for the award winning Wireless CCTV 3G Mini-Dome camera and in fact can provide a portable power source for many different applications.

### Applications include:

- ✓ Road traffic survey & intelligent data collection
- ✓ Temporary security surveillance
- ✓ Event management surveillance & campus security
- ✓ Queue detection platform

### Key Features & Benefits

- ✓ Remote data collection via GPRS communications
- ✓ Queue detection with communication to our Advantage series of pVMS
- ✓ GPS for asset tracking, security & fleet management
- ✓ Cost effective & environmentally friendly - non-diesel
- ✓ Superior power management with on board charger
- ✓ SmartSensor can monitor up to 10 lanes of traffic for volume, occupancy and speed.
- ✓ Telescopic mast extends to 7.9 metres (26ft) high
- ✓ Weather tight control cabinet
