

# SENSOR TRAILER T25-ST

AVAILABLE TO HIRE OR BUY

## MTS T25-ST Portable Traffic Detection & Data Collection Trailer

MTS the UK market leader in solar Variable Message Signs, has a range of portable units for sale or hire to detect traffic levels and collect data.

The MTS T25 Sensor Trailer (T25-ST) is a compact, self contained battery powered, solar recharged unit which supports our dual fire high definition radar system to measure traffic flows, volumes, speeds and vehicle type. Its non-invasive nature eliminates the need to cross carriage-ways unlike traditional invasive counting systems.

The T25-ST is fitted with the latest remote communications modem which can supply either live traffic data to provide queue detection, or store historical data for periodical download to be used to assist the efficiency of other ITS systems, average speed camera compliance and help local authorities assess current traffic volumes.

## Features & Benefits

- ✓ Portable unit requires no power supply
- ✓ Long battery life for easy long term operation
- ✓ Remote communications
- ✓ Monitors traffic volume, speeds and vehicle size
- ✓ Multi-lane operation
- ✓ Safely installed without live road intervention
- ✓ Available to Hire or Buy throughout the UK
